

Project Design Phase-I

Proposed Solution Template

Date	23 September 2022
Team ID	PNT2022TMID08196
Project Name	Plasma Donor Application
Maximum Marks	2 Marks

Proposed solution:

Aim of the project is to improve the features of plasma donor application which problems are facing by users to overcome those problems solving through the cloud computing.

S.No	Parameter	Description
1	Problem statement (problem to be solved)	It is much challenging to dig out respective blood group donors to a specific people those who are in need. And it is tough to locate the location of either donor as well as the needy.
2	Idea / Solution description	Developing app which shows the requirement of plasma in accordance to blood groups. Accessing GPS location of both the donor and the needy for finding the nearest donor.
3	Novelty / Uniqueness	It is easy to get the nearest donor location of the respective blood group
4	Social Impact / Customer Satisfaction	We can save life who are in need of plasma and also bring awareness of donating plasma among the people.
5	Business Model (financial Benefit)	We can collaborate with government and it can utilize app to help the people need of plasma.
6	Scalability of Solution	Donors connect instantly with those who are in need as per specific blood groups to the specific location needed.
